Report Text (Bekantan, Orangutan, Indonesian Birds) & Passive Voice in Present Tense

• Unit 1: Bekantan

AUTHENTIC READING STIMULUS (REPORT / RECOUNT / NARRATIVE / PROCEDURE / INFOGRAPHIC):

Bekantan (Nasalis larvatus): Bekantan, or the proboscis monkey, is an endemic primate of Borneo (Kalimantan, Malaysia, and Brunei). Its scientific name is Nasalis larvatus. It is easily recognized by its large, long pendulous nose and reddish-brown fur. An adult male Bekantan weighs about 16 to 22 kg and has a long tail (up to 75 cm). Bekantans are arboreal and live in coastal mangrove forests. Uniquely, they have webbed feet that help them swim skillfully across rivers to escape predators like crocodiles. Unfortunately, Bekantans (1) ... as Endangered by the IUCN due to mangrove deforestation.
Orangutan (Pongo pygmaeus / Pongo abelii): Orangutans are great apes native to the rainforests of Borneo and Sumatra. Unlike Bekantans, orangutans do not have a tail, and they are much heavier (adult males weigh up to 75–90 kg). They build nests high in the forest canopy from branches and leaves.

• Unit 3: Indonesian Birds

AUTHENTIC READING STIMULUS (REPORT / RECOUNT / NARRATIVE / PROCEDURE / INFOGRAPHIC):

Read the Report Text about Two Iconic Indonesian Birds below for questions number 16 to 25 (Unit 3: Indonesian Birds)!
Indonesia is home to over 1.800 bird species, including the Helmeted Hornbill (Rangkong Gading – Rhinoplax vigil) and the Cendrawasih (Bird of Paradise – Paradisaea apoda).
The Helmeted Hornbill is a very large forest bird native to Sumatra and Kalimantan. It has blackish-brown feathers, a white belly, and two remarkably long central tail feathers that can reach up to 120 cm in length. Its most distinctive feature is its solid red casque (helm gading) on top of its beak, which accounts for 11% of its body weight! Male hornbills use this solid casque in mid-air head-to-head clashes to defend fruit trees. During the nesting season, the female hornbill seals herself inside a high tree cavity using mud and fruit pulp, leaving only a narrow slit through which the male feeds her and their chick for months. Tragically, the Helmeted Hornbill is listed as Critically Endangered because it is poached for its solid casque.
Meanwhile, the Greater Bird of Paradise (Cendrawasih) is native to Papua and the Aru Islands. Male Cendrawasih birds are famous for their dazzling golden-yellow crown, emerald-green throat, and fluffy yellow-and-white flank plumes used in elaborate courtship dances.

Read Monita's Personal Travel Letter and Trip Itinerary Table below for questions number 16 to 25 (Unit 3: My Underwater Adventure & Personal Letter)!
Banyuwangi, November 5th, 2026
Dear Cousin Tamara in Bandung,
How are you doing? I hope you and Aunt Sari are doing great! I am writing this letter to tell you about my school field trip to Bangsring Underwater Conservation in Banyuwangi last weekend. Have you ever visited a floating shark conservation house (Rumah Apung)? It was amazing!
We arrived at Bangsring Beach at 08.30 a.m. First, a marine biologist explained how local fishermen trans- formed damaged coral reefs into a protected marine conservation zone.
Next, we put on our life jackets,
snorkeling masks, and fins, and took a short boat ride to the Floating House. While I was floating on the crystal-clear water, hundreds of blue-and-yellow damselfish (ikan betok laut) swam around my hands! After lunch, we planted baby coral fragments onto underwater iron frames to help restore the reef. I have attached three photos for you. You must visit Banyuwangi next holiday!
Warmest love,

AUTHENTIC READING STIMULUS (REPORT / RECOUNT / NARRATIVE / PROCEDURE / INFOGRAPHIC):

Study the Digital Literacy Survey Infographic Summary and Analytical Text below for questions number 16 to 25 (Unit 3: Turn Back Hoax! & Defending Arguments)!
SMP Merdeka Digital Literacy Survey (Sample: 200 Grade 9 Students):
• Daily Screen Time: 45% spend 2–3 hours/day (mostly for E-learning & coding); 35% spend 4–5 hours/day (social media & videos); 20% spend > 6 hours/day (online gaming late at night).
• Response When Seeing Viral News: 60% (120 students) cross-check with official news/teachers first; 25% (50 students) ask in the class group chat; 15% (30 students) forward it without checking.
Analytical Argument by Monita (Editor of the School Digital Magazine):
"In my view, smartphones and the internet are powerful learning tools when used wisely. Firstly, digital platforms allow students to access global libraries, interactive science simulations, and language dictionaries in seconds.
Furthermore, school group chats help us coordinate charity drives and study groups efficiently.
However, excessive screen time late at night (over 6 hours a day) harms students' sleep quality and eyesight.
Therefore, we should set a daily screen-time limit and always practice the S.I.F.T. fact-checking method before sharing any information online."
